Read up here for tips on how to fly RC gliders/ sailplanes and get into thermal, slope and dynamic soaring!. Thermal soaring RC gliders, can be launched using several different methods. Four types of launching are described, from the simplest bungee to the tow plane. One of the most fascinating and interesting segments of RC flying is Soaring. Finding a thermal and rising without power to unlimited heights is both exhilarating. Today its name has changed to "RC-Soaring Subcommittee" as it is responsible for the development and monitoring F3B - Multi Task Thermal Soaring Gliders. This chapter introduces the concept of radio controlled soaring. R/C soaring is of R/C Soaring. There are two general classes of soaring: thermal and slope.
